To: GAF Cobra® Ventilation Distributors

Subject: Cobra® Plastic Vents – Polypropylene Raw Material Cost Increase

Due the severe effects of Hurricane Harvey in Texas, there has been a significant disruption in polypropylene supply resulting in a projected 10% increase in polypropylene raw material costs. Polypropylene is the major component used in the manufacturing of Cobra® Plastic Vent products.

As a result, GAF will be passing along this polypropylene raw material cost increase beginning October 1st, 2017.

Please note, this will apply to all Cobra® Plastic Vent products sold in the US & Canada. If you have any questions, please contact your local GAF Territory Manager.

Thank you for your patience and continued support.
